About Us

Altek Industrial Construction Market is a family company operating in the industrial construction market sector with its experience of over 30 years.

In the following periods, it has developed itself depending on the sector's development and has managed to become a significant player in occupational health and safety products. Accordingly, it produces medical masks, surgical gowns, disposable overalls and FFP2-FFP3 masks under international standards under the brand name Safetouch. Safetouch is a company that exports 90% of its capacity to Europe, England and USA. Finally, it has produced 100% hygienic surgical masks in single packages with wide and highly elastic rubber properties.

Altek with its Safetouch brand, aims to be among the global companies quickly by increasing its effectiveness in customer oriented work as a successful manufacturer business according to international standards with its products in the field of expertise required in the world market.

altek nonwoven

Spunbond Nonwoven Fabric

In the textile industry, the spunbond nonwoven is a fabric used in various technics and made of completely polypropylene.

Meltblown Fabric

Meltblown fabric is produced using micro and nanofibers where polymers melt is squirted through small nozzles surrounded by high speed blowing gas. Meltblown fabric is generally used, such as filter, mask, sound insulation, industrial cleaning, etc. the feature of meltblown is antistatic.
